Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 9, 10, 36 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by the PCT publication to Carrender ('974).
3. Claims 1, 9-11, 15, 16, and 36-39 are rejected under 35 U.S.C. 102(b) as being anticipated by the PG-Publication to Kosowsky et al ('015).
4. Claims 1, 9-11, 15, 16, 40 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by the PG-Publication to Heide et al ('615).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4, 5, 13, 14, 17-20, 34 and 35 rejected under 35 U.S.C. 103(a) as being unpatentable over Carrender (974), Kosowsky et al ('015) or Heide et al ('615) in view of JP ('382).

The above rejection of the claims may be found on the PCT form 210 which applicant supplied in the IDS filed February 16, 2006.

7. Claims 1-41 are rejected under 35 U.S.C. 102(a and/or e) as being anticipated by the PG-Publication to Kuroda et al ('173).

Per independent claims 1, 11, 17, and 36-41, the PG-Publication to Kuroda et al discloses a radar system that includes a transmission section (10), a reception section (11), and a section (15) that calculates phase, distance and speed (see para. 28).

Dependent claims 2-10, 12-16 and 18-35 are further provided by the structure disclosed by Kuroda et al.
